

AMENDMENTS TO THE CLAIMS

Presented below is a complete set of claims with current status indicators.

1. (original) A battery pack for a medical device, the battery pack comprising:
 - a power supply capable of being connected to the medical device; and
 - an indicator to automatically indicate a status of at least a portion of at least one of the battery pack and the medical device.
2. (original) The battery pack of claim 1 wherein the indicator comprises a visual indicator.
3. (original) The battery pack of claim 2 wherein the visual indicator comprises a light emitting diode.
4. (original) The battery pack of claim 3 wherein the light emitting diode flashes when at least one of the battery pack and the medical device are operating properly.
5. (original) The battery pack of claim 3 wherein the light emitting diode flashes to indicate a fault condition.
6. (original) The battery pack of claim 1 wherein the indicator comprises an audio indicator.

7. (original) The battery pack of claim 6 wherein the audio indicator comprises an enunciator.

8. (original) the battery pack of claim 1 wherein the indicator communicates that the medical device has failed a self test.

9. (original) The battery pack of claim 1 wherein the indicator indicates a state of the power supply.

10. (original) The battery pack of claim 1 further comprising a microcontroller connected with the indicator.

11. (original) The battery pack of claim 10 wherein the microcontroller controls the indicator to indicate status.

12. (original) The battery pack of claim 1 wherein the medical device comprises an external defibrillator.

13. (original) The battery pack of claim 1 wherein the indicator indicates a status independent of the battery pack being connected with the medical device.

14. (original) A battery pack for a medical device, the battery pack comprising:

an indicator to automatically indicate a status of at least a portion of at least one of the battery pack and the medical device, wherein the indicator indicates the status independent of the battery pack being connected with the medical device.

15. (original) The battery pack of claim 14 wherein the indicator comprises a visual indicator.

16. (original) the battery pack of claim 15 wherein the visual indicator comprises a light emitting diode.

17. (original) The battery pack of claim 16 wherein the light emitting diode flashes when at least one of the battery pack and the medical device are operating properly.

18. (original) The battery pack of claim 16 wherein the light emitting diode flashes to indicate a fault condition.

19. (original) The battery pack of claim 14 wherein the indicator comprises an audio indicator.

20. (original) The battery pack of claim 19 wherein the audio indicator comprises an enunciator.

21. (original) The battery pack of claim 14 wherein the indicator communicates that the medical device has failed a self test.

22. (original) The battery pack of claim 14 further including a power supply.

23. (original) The battery pack of claim 22 wherein the indicator indicates a state of the power supply.

24. (original) The battery pack of claim 14 further comprising a microcontroller connected with the indicator.

25. (original) the battery pack of claim 24 wherein the microcontroller controls the indicator to indicate status.

26. (original) The battery pack of claim 14 wherein the medical device comprises an external defibrillator.

27. – 39. (canceled)
